

# NEW Cloud Solution: NEOREKA Cloud PC

## A simple and flexible virtual desktop using cloud

### as the new public service called DaaS (Desktop as a Service)

For details, please visit <https://neoreka.cloud>

We recommend using **DaaS "Cloud VDI (Virtual Desktop) Service"** for Teleworking

"NEOREKA Cloud PC" (DaaS) + "desknet's NEO" (Groupware)

= **Telework's strongest tools!**

### DaaS Basic Service

**3** Bundled with Microsoft Office2019® standard apps

※ Word®, Excel®, PowerPoint®

**1 user**  
**¥2,980**  
**Monthly**

(without tax)

**¥0** Initial cost

**5GB** 1 user Disk space

※ Add up to 70GB

Your **computer** is in the **cloud**. This is called a "Virtual Desktop Environment". Therefore, you can access your computer from anywhere and from any terminal as long as you have an internet environment.

### Affordable DaaS that can be used even by 1 user

Admin only needs **4 steps** to set up DaaS!

※ Once the base and group have been registered, you only need to add the user creation step. No special knowledge is required to configure VDI on the cloud.

- 1 Admin Login**
- 2 Create Base**
- 3 Create Group**
- 4 Create User**

When connecting directly from the web, click the URL to access using the **WebRDP** mechanism. In this case, the security is such that local resources (printers and disks) cannot be accessed. Access to local resources is granted using the attached **RDP Module**.

To user's email address

- VDI connection URL
- User ID, password
- RDP module

### Any device can be used, comfortable to use anywhere

Personal computers, Internet cafe computers, rental PCs; able to achieve strong security in any terminal environment!

All access to the same Windows® desktop

User screen

※ All products and services of other companies are registered trademarks of the providing vendors.

### DaaS Usage Scene

**Remote work** For rental space, home, satellite work

**Use of devices that are not tied to a computer** Utilize device assets such as iOS and tablet devices

**Business trip destination** From Shinkansen, business trip destination hotels, etc.

**Project use** For period use and provision of usage environment to third parties.

**Educational tools** Share a small number of PCs and make effective use of them

**Industry app dedicated terminal** Securely use customer management at construction sites and shops

### Evolving Services

User administrators are able to request applications that they want to use in the NEOREKA Cloud PC in the future.

#### Service evolution

① ICUBE Inc.  
"Construction Cost Management Software: HONKE Series®" Collaboration

Other than cloud computing of the software, a virtual desktop service with Word / Excel / PowerPoint app attached as standard has been launched at the same time!

#### Service evolution

② Mint Wave Co., Ltd.  
Compatible with USB Thin Client "Yubikura with®"

Make your PC a secure business terminal environment by simply inserting the USB key! You can turn your PC into a thin client in combination with NEOREKA Cloud PC!

### Overwhelming Cost Performance

Generally, **DaaS** used by **enterprises** (VDI tools are included), require **server** units to be provided, with conditions such as more than **50 users**, a **separate fee** for **base infrastructure services**, and a **complicated fee system**, which results in **higher cost**.

NEOREKA Cloud PC provides services with a **clear fee structure** of only **monthly fee per user**, plus the monthly usage fee of **DaaS Basic Service** is **2,980 Yen (without tax)/user**. It has an overwhelming cost performance and a simple fee structure compared to other DaaS providers, thus contributing to the **reduction** of **total cost** of ownership (TCO) of companies.

### Reasons to Choose NEOREKA Cloud PC

#### COST

- A safe and secure teleworking environment with minimum cost, under COVID-19 countermeasures.
- Overwhelming cost performance compared to other DaaS providers.
- Contributes to the reduction of the total cost of the company.
- ¥0 Initial cost.

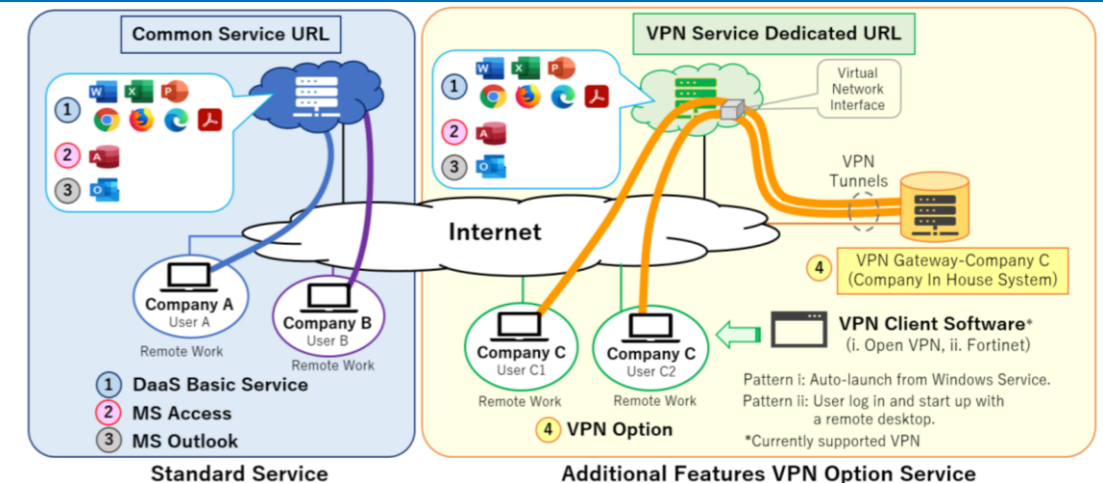

#### SECURITY

- Managed and operated on Microsoft Azure®, the world's top level in terms of security.
- Protected by a strong security system, we will continue to provide stable services at all times.
- Advanced security system operation service.
- VDI exchanges on the cloud are encrypted.
- Operation monitoring 24 hours a day, 365 days a year.

#### OPERABILITY

- Even 1 user can use the virtual desktop environment at a reasonable price.
- It is possible to create and run an infinite number of virtual desktop areas.
- High-speed communication is possible, which does not heavily depend on the specifications of the terminal used.
- The administrator does not need to manage and operate the system.

### NEOREKA Cloud PC VPN Service Structure

### NEOREKA Cloud PC Price List
